Facts about APRIL

"April showers bring May flowers"

April was the second month in an early Roman calendar, but became the fourth when the ancient Romans started using January as the first month. The Romans called the month Aprilis. It may come from a word meaning 'to open', or it may come from Aphrodite, the Greek name for the goddess of love.

Small animals that hibernate are usually coming out of their burrows in April. The birds fly back northward or they settle down to have their families. The bees and butterflies begin to gather nectar from the first flowers of the season.

Special days celebrated in April begin with the first day of April, when children and grown-ups play jokes on one another. Arbor Day is a day for planting trees, and it is observed on various April days. The Jewish festival of Pesach (Passover) is celebrated early in April.
